

April 28, 2020 Open letter to South Bruce Council

To the Members of the Municipality of South Bruce,

As a long time resident of South Bruce, I have absolutely zero interest in the DGR project. Putting high level radioactive waste in ""secure" containers underground is the craziest idea to me!! There isn't any amount of "education" or "visionary workshops" that will convince me otherwise.

Lots of short term money from NWMO, disaster for future generations. Is money really that important when in the end our beautiful land and water are destroyed?

There are a few people who are really for this DGR, thinking it will attract people to our area and help our little town survive. There are many people who disagree!

I feel we need to vote. Do you support a DGR for high level radioactive waste in South Bruce? Yes or No

Sylvia Voisin
